TVAC40830

5 m CAT 5 cable

This network cable is used to connect your network camera e.g. to a router or PC. The cable with a twisted pair of wires (twisted pair cable) is available in different categories. Category 5 (CAT5) is used for wiring IP camera and computer networks, such as fast ethernet. Thanks to this, high data transfer speeds of 100 MBit/s are guaranteed. The CAT5 network cable is available in a length of 20 m (TVAC40850), 10 m (TVAC40840), 5 m (TVAC40830), 3 m (TVAC40820), 2 m (TVAC40810) and 1 m (TVAC40800).

Product highlights:

- To connect network cameras to e.g. routers and PCs
- RJ45 plug incl. anti–kink sleeve
- Use in multimedia networks and telephone systems
- Suitable for use with ABUS IP cameras
- 8–pin RJ45 connections
- Length 5m

TVAC40830

5 m CAT 5 cable

Technical Data	
Type of cable	Cat 5e
Area of use	Indoor areas
Connections	8–pin RJ45
Insulation	HDPE
Insulation resistance	5000M/KM
Outer insulation	PVC
Outer diameter	5.2mm
Operating temperature	–10 – +60
Length	5m
